

A High Performance Low Profile Reader

The 4100-WS is a single piece fully sealed proximity read head. It is suitable for mounting on all surfaces, and in any environmental conditions. The 4100-WS is ideal for applications requiring low profile surface installation where the thickness of the reader must be minimal such as, elevator cars, and narrow passage ways. It is also ideal for installations where architectural subtleness is important.

This reader may be mounted directly to a wall surface over a standard single gang electrical junction box. The reader's mounting holes will line up with the junction box.

The 4100-WS receives its regulated power from the Remote Command Module, so it requires no additional power supplies.

Specifications

- Size 4.6"H x 3.0" W x .65" T
- Read Range 4"
- Input Voltage 5VDC (Supplied by command module)
- Operating Temperature -30° to 65°
- L.E.D. Indicates access accepted or denied
- Color Beige or Black
- Environmental Fully potted and hermetically sealed
- Mounting Surface
