

PROXIMITY • MAG STRIPE • BAR CODE • DIGITAL IMAGING ISO CREDIT CARD COMPATIBLE IDENTIFICATION

The Toye Corporation *OneCard* marries the industry's latest credential technology into one high tech solution for Access Control, Digital Imaging, Debit, and ATM compatibility.

Proximity Access Control

The *OneCard* incorporates an embedded processor with a unique number that can never be duplicated. When presented near a

Toye Corporation Proximity Reader, access is granted or denied in less than 30 milliseconds.

The Proximity Reader is actually a miniature antenna that is fully encapsulated in hard plastic. It is guaranteed for use in any environment, and never needs maintenance or adjustment. It is compatible with all Toye Corporation Command Modules, and can be retrofitted to any existing system.

Multi-Technology Encoding

The *OneCard* contains an ABA/ISO compatible magnetic stripe allowing encoding on all three tracks. This means that you can combine ATM encoding on track 2 with Debit System encoding on track 1 or 3.

You can also print a Bar Code anywhere on the card for Time & Attendance applications, Library systems, and Audio-Video check out controls systems with Digital Imaging.

Digital Imaging

Both sides of the card can be used for digital imaging using the industry's latest dye sublimation printers. You can use virtually any Digital photo ID system on the market including the one provided in our Access Central System software at no cost.
