

Model 4100-SLIM Proximity Reader

General

The Model 4100-SLIM is a standard indoor/outdoor proximity reader. It is completely environmentally sealed and is unaffected by severe weather.

This reader may be mounted against a metal surface, but cannot be completely surrounded by metal such as when recessed too deeply into a metal hooded parking housing.

Mounting

The 4100-SLIM may be surface mounted directly to any wall surface. Two mounting holes are provided. The Command Module may be mounted up to 50 feet from the reader. An optional self-contained housing as shown above is also available to simplify field wiring and installation.
