PARKING REVENUE TIME

(Rounded Up)

Cardholder Name	Card Number	Trans Date	Entry Reader	Time In	Exit Reader	Time Out	Elapsed Time	Revenue Time
Jack Williams	466	8/28/97	01	08:06	02	18:14	608	630
	466	8/29/97	01	08:06	02	18:14	608	630
						Totals:	1216	1260
Robert Fuller	463	8/28/97	01	08:06	02	18:10	604	630
	463	8/29/97	01	08:06	02	18:10	604	630
						Totals:	1208	1260
Bud Toye	44	8/28/97	01	08:06	02	09:08	62	90
	44	8/28/97	01	12:06	02	19:08	422	450
	44	8/29/97	01	08:06	02	09:08	62	90
	44	8/29/97	01	12:06	02	19:08	422	450
						Totals:	968	1080

Some parking operators bill customers for the amount of parking time actually utilized by each cardholder. If so, this is the system for them. You can create tenant groups in order to create a total monthly bill for that tenant, or you can report on specific cardholders separately. What you include in the report is a variable input that can be specified in seconds using a simple “text string search” for the desired record criteria.

The sample report above shows “Revenue Time” which is the actual time in minutes rounded up to the next half hour. You can customize this report, or we can customize it for you so that each customer achieves their exact requirement.

TIME AND ATTENDANCE REPORT

Cardholder Name	Card Number	Trans Date	Entry Reader	Time In	Exit Reader	Time Out	Elapsed Time	Hours Worked
Robert Smith	12345	9/29/97	01	07:59	02	12:00	241	4.01
	12345	9/29/97	01	12:45	02	17:00	255	4.25

	67890	10/3/97	01	13:30	02	16:30	180	3.00

Time & Attendance reports are now a few mouse clicks away with a “PC” Central Access Control System. Our new Access Central software for Windows 95 extracts payroll data from the access control system’s activity log. Just tell Access Central which readers are for clocking IN, and which readers are for clocking OUT. The software will calculate how much time each day the cardholder was “IN”.

You can generate reports for some or all cardholders using a start and stop date. You can setup the database so that reports can be run by department, or any other logical grouping. Because it’s Microsoft Access based, you can customize the reports to suit your specific requirements.
