Re: Warranty on AC-Win-Soft Toye Software

Dear _____,

Due your request for our new Windows software with an unlocked Access database, it is necessary for us to have an understanding of the impact of an unlocked database on the Toye warranty. In the event that any problems are encountered with the software, if these problems are found to be a result of changes that you or your associates made in the database to accomplish your objectives, then the warranty will not apply to any efforts needed to fix these problems if it is even practical to do so. If you want the problems fixed by Toye Corporation, you will be charged the prevailing rate at the time for our software services, the current rate being \$250.00 per hour. If we are unable to adapt our software to meet your modifications, or if you are unwilling to pay Toye Corporation to make such repairs, Toye's obligation shall be limited to providing a new copy of the standard working database.

Sincerely,

Agreed to:

Gordon S. Morris
